SECTION 6 EDUCATION

The digital education revolution

The Digital Education Revolution – a major part of the Australian Government's Education Revolution – is a vital step in creating a world-class education system for Australia. The aim of the program is to contribute sustainable and meaningful change to teaching and learning in Australian schools that will prepare students for further education, training and to live and work in a digital world. Funding of \$2 billion has been earmarked for:

- The National Secondary School Computer Fund, to provide for new information and communication technology (ICT) for all secondary schools with students in years 9 to 12.
- The Fibre Connections to Schools initiative, a contribution of up to \$100 million to support the development of fibre-to-the-premises (FTTP) broadband connections to Australian schools.
- Collaboration with states and territories and Deans of Education to ensure new and continuing teachers have access to training in the use of ICT that enables them to enrich student learning.
- \$32.6 million over two years to supply students and teachers with online curriculum tools and resources to support the national curriculum and conferencing facilities for specialist subjects such as languages.
- The development of online learning and access that will enable parents to participate in their child's education.
- \$10 million over three years to develop support mechanisms to provide vital assistance for schools in the deployment of ICT.

School Computer Fund

The National Secondary School Computer Fund is the key component of the initiative. The Australian Government is investing \$1.1 billion over five years (2008–2012) through the Fund, to provide for new or upgraded ICT for secondary schools with students in years 9 to 12.

The initial target is a ratio of one computer to two students.

By early 2009, through two funding rounds, a total of 2290 secondary schools from Government, Independent and Catholic sectors right across Australia, had received funding for more than 258,000 computers. This saw these schools move to a computer to student ratio of 1:2.

Grants of \$1000 per computer have been provided.

In recognition that there are additional costs associated with the implementation of the School Computer Fund, the Australian Government has recently provided additional funding of \$807 million to be provided to education authorities to contribute to the costs of installation and maintenance of the additional computers purchased. The Government will provide grants of up to \$2500 for each additional computer provided under the Fund to increase the number of computers available to students.

Computers which are replacing those four years or older, will continue to attract funding of \$1000 per unit as infrastructure is already in place.

Fibre connections to schools

Access to reliable, affordable, high speed broadband connections will strengthen the capacity of students, parents, teachers and the wider community to communicate, collaborate and access resources across system, State/Territory and national boundaries.

In recognition of this potential, the Government has committed \$100 million to the Fibre Connections to Schools (FCS) initiative. The FCS will contribute to the provision of fibre-to-the-premises (FTTP) broadband connections to Australian schools to deliver speeds of up to 100 megabits per second. ■

WHERE LEARNING COMES ALIVE

St Hilda's is an Anglican Diocesan day and boarding school for girls that has been serving rural communities of Australia for almost 100 years.

- Pre-Preparatory to Year 12
- Boarding from Year 6
- Concern for individual needs
- Commitment to academic excellence
- Caring and experienced staff
- Wide choice of cultural activities
- Excellent sporting facilities
- 14-hectare campus

You are invited to visit St Hilda's at any time to meet academic and boarding staff and tour the School's facilities.
